## Clinical Indications for Admission to Recovery Facility

[Return to top of Ankle Dislocation - RFC](#)

- Skilled nursing facility (SNF) or subacute facility care is/was needed for appropriate care of patient because of **ALL** of the following:
  - There are no acute hospital care needs.(1)
  - The patient has [Intense and complex care needs](#) that make recovery facility care safer and more practical than attempting care at a lower level and **ALL** of the following(A)[B](4):
    - These care needs include the multiple components of care that are delivered by skilled professionals at a recovery facility.[C][D][E]
    - There is a plan to provide **ALL** of the following(14):
      - Care plan management and evaluation to meet patient needs, achieve treatment goals, and ensure medical safety(15)
      - Observation and assessment of patient's changing condition to evaluate need for treatment modification or for additional procedures until condition stabilized
      - Education services to teach patient self-maintenance or to teach caregiver patient care(16)(17)
      - [Skilled care](#) treatments daily (or more frequent), including **1 or more** of the following:
        - Nursing treatments needed for **1 or more** of the following(18):
          - Intravenous (IV) infusion, IV injection, or intramuscular (IM) injection(1)(16)
          - Wound management that requires dressing changes with prescription medication or clean technique and treatment for **1 or more** of the following(1):
            - Foot infection or wounds with application of dressing
            - Surgical wound complications
          - Patient care training and assistance for **1 or more** of the following(19):
            - Exercise program (eg, range of motion, pulmonary, cardiac)(20)
            - Safe performance of ADL (eg, dressing, communicating, eating)
            - Splint, brace, cast, prosthesis, or orthosis management(21)
